

HorseBlanket Generation Tool

HBG

The HorseBlanket Generation Tool was developed for the architecture community to provide a common interface in which users can quickly create and edit horseblankets.

- HorseBlankets can be created in three sizes; Standard HorseBlanket ("E" Size), PonyBlanket (8½ x 11), and a MuleBlanket (11 x 17)
- Provides an efficient and rapid drawing capability
- Users can print out some or all of the units they choose
- Users have the ability to color-code systems for immediate recognition
- Can be configured to adapt to the user's environment
- Uses Microsoft Visio for powerful layout and icon drawing
- Templates are provided or custom templates can be made and used with the tool
- Users can simply create a new page, give the page a title, then choose one major unit and any number of subordinate units
- The tool saves settings of previous HorseBlankets to be reused
- Future Enhancements Include:
 - The ability to create indexed HorseBlanket booklets
